

Android Mobile Application Development Proposal

Project Overview

Based on the analysis of the existing Learning Management System (LMS), the Android application will provide students with a complete mobile learning experience while reusing the existing backend APIs and business logic.

Core Features Included

- User Registration & Login
- Google Sign-In
- Course Catalog & Search
- Course Details & Enrollment
- Video Learning Module
- Progress Tracking
- My Courses Dashboard
- Study Notes & PDF Viewer
- Doubt Management System
- Quiz & Assessment Module
- Certificates Module
- Push Notifications
- Profile & Settings Management

Technical Scope

Android App using React Native
API Integration with Existing Backend
Firebase Push Notifications
PDF Viewing & Download Support
Google Authentication Integration
Play Store Ready Build

Deliverables

- Complete Android Application
- Source Code
- API Integration
- Testing & Bug Fixes
- Production APK / AAB
- Play Store Deployment Support

Timeline

Phase 1: Authentication & Course Modules – 2 Weeks
Phase 2: Notes, Doubts, Certificates – 2 Weeks
Phase 3: Quiz System & Notifications – 1.5 Weeks
Phase 4: Testing & Deployment – 1 Week

Total Estimated Timeline: 6–8 Weeks
